Art Unit: 2635

1. This Office action is in response to the application filed January 17, 2002. Claims 1-18 are pending.

DETAILED ACTION

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-1-14, drawn to a temperature sensor for an electric meter, classified in class 340, subclass 584.
 - II. Claims 15-18, drawn to a method for disconnecting power to a customer, classified in class 705, subclass 63.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a method of regulating power to a customer. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. A telephone call was made to Steven Santema on June 26, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2635

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Albert K Wong whose telephone number is 703-305-8884. The examiner can normally be reached on M-Th.
